1.7 Pending Issues

No.	Issue Description	Possible Result	How to Fix
1	14 items failed the ONVIF test.	Further commissioning is needed for ONVIF access.	Commision the device again for ONVIF access.
2	The user data has been distributed to the controller. When the controller is re-added after all controllers have been deleted by batch on the web, the controller is likely to go offline after going online or to go online slowly.	The controller will be deleted instantly after 100 fingerprints are distributed and then all be re-added. The controller will go online within 10 to 20 minutes.	<ul style="list-style-type: none"> ● Wait for 10 minutes before going online again. ● Fix the problem in the next version.
3	Verification fails due to the lack of access platform for auto registration.	Auto registration needs to be commissioned after being customized on the project.	Finish the commissioning after auto registration is customized on the project.
4	Issues about Configtool: program version fails to display; wrong display of the device type.	Configtool issues.	Upgrade Configtool.

1.8 Update Guide

Refer to the following instructions when upgrading the device.

Step 1 Open **Configtool**.

Step 2 Search for the access IP.

Step 3 Click **Update**.

Step 4 Download the upgraded APP program.

Step 5 Click **Confirm**.
